Where Do You Keep Your Valuables?

You can't always carry them around with you. It isn't expedient, and it isn't safe. Liberty Bonds and other securities, heirlooms, your will, and other private papers should be safely tucked away where you only (or such persons as you may designate) may get at them.

You may rent a strong-box in a huge steel vault (the doors weigh seven tons), fire-proof, protected by every safeguard that the skill of man can devise—safe from all prying eyes and accessible any business day.

It costs very little. A courteous attendant will show you the vault and tell you anything you wish to know.

Army Captain's Wife Had Discovered His Dual Life

Not there about 7:30 and left about 11:30.

I had left my diary and account book open, and I am still wondering what he did about them.

March 2 (Monday)—Lunched with my Cliff at Blevins's yesterday. He took Roger and Art out north for a birthday party. How odd to take them out there!

Said I would phone Cliff today at 1:30, but he ducked out, and I have phoned him everywhere and can't find him yet. I left it 11:30 a. m. I am nearly crazy thinking of him out and about.

March 6 (Saturday, 9:10 a. m.)—Cliff phoned. Swore at me furiously about my phoning at 8 a. m. and 11:30 the night before. Andre (Blevins's) called and said that he had phoned me about nothing but was and hung up.

Indigestion**

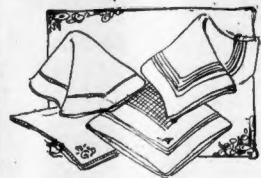

One Day's Test Proves NR Best

The stomach only partly digests the food we eat. The rest of the food is mixed with bile from the liver. It must be plain to any sensible person who realizes this, that the stomach, liver and bowels must work in harmony. If they do not, indigestion, constipation, flatulence and other ailments will be the result. Nature's Remedy (NR) Tablets will cure you. Give it a trial for a week or two.

Get your organs of digestion, assimilation and elimination working in harmony and watch your trouble disappear. NR does it or money back.

POLICE POSSE BLOCKS HOLDUP

Three Arrests in Millbury. Where Gang Sought \$10,000 Payroll

Worcester, March 25.—In a sensational roundup which rivalled the thrilling movie stunt, three men were taken in custody and another held on suspicion by a posse of twenty-five Boston, Worcester, Millbury and railroad police and detectives, frustrating a daring attempt to hold up and rob the payroll of the Western Company in Millbury of \$10,000.

The men arrested are: Ciro Landi, twenty-seven, of No. 30 Thorne street, Worcester; Placid Vincenzo, twenty-six, Chicago street, Boston; and Joseph La (name), twenty-six, of No. 17 East Central street, Worcester.

David E. Cooper, thirty, of No. 30 Columbia street, Worcester, owner and driver of the automobile in which they were arrested, is being held on suspicion and the police infer that a more serious charge may be lodged against him.

MAY SOLVE R. R. THEFTS.
 With the arrest of the principal trio the police believe they have found the solution of the dozen or more recent and repeated robberies that have cost New England railroads thousands of dollars in the past few months. A robbery on Haver street, Boston, has been traced to members of the gang, according to the authorities.

The capture of the men, which included a display of raw nerve, black backs and the use of pistols, was the most sensational that has ever taken place in Millbury and has many persons witnessed the affair, having been sent broadcast throughout the town that a robbery was in progress.

WITNESSED BY PUPILS.
 The roundup was made directly in front of the high school building and pupils and teachers were entranced spectators.

A tip received by Inspector Ferrar that carefully laid plans had been made to waylay and rob the Western payroll resulted in quick action on the part of the police and a posse of fully twenty-five officers was called together and counter-chase made to frustrate the holdup.

The police patrol, which aggregates \$10,000, is brought from the Mechanic National Bank in Worcester to the office of the mill. The money was being taken away at the same time on each pay day, and apparently it was with this fact in mind that the alleged holdup was made there, as the police infer.

It was believed that an attempt would be made to attack the payroll while he was en route from the bank to the mill with the bag of money.

HOW TO DARKEN GRAY HAIR

A Cincinnati Barber Tells How to Make a Remedy for Gray Hair

Mr. Frank Harbaugh of Cincinnati, Ohio, who has been a barber for more than forty years, recently made the following statement:

"Anyone can prepare a mixture at home at very little cost that will turn gray hair, and make it soft and glossy. To a half-pint of water add 1 ounce bay rum, a small box of Borax Compound and 1 ounce glycerine. These ingredients can be bought at any drug store at very little cost. Apply to the hair twice a week and the dark hair will be obtained. This will make a gray-haired person look twenty years younger. It is easy to use, does not color the most delicate scalp, is not sticky or greasy and does not rub off."

WHITE NURSE TO WED NEGRO

Everett Girl to Be Bride of War Veteran, Now a Realty Dealer

Miss Jennie Mae McLean, of No. 42 Fuller street, Everett, a white nurse, will be married within a few days to a colored war veteran, Thomas S. Fletcher, of No. 28 West Washington street. He is twenty-eight and Miss McLean is twenty-two.

They met, according to Fletcher, about four months ago at Dedham, where Miss McLean was employed as nurse on a private home and Fletcher as a waiter. He is now in the real estate business on Tremont street.

"Neither she nor I consider race or color," said Mr. Fletcher. "I met her Monday evening, and we have been together ever since. We are not breaking the law. I don't see why anyone is interested in us."

Miss McLean is a native of Gloucester, Mass.

HOW TO DARKEN GRAY HAIR

A Cincinnati Barber Tells How to Make a Remedy for Gray Hair

Mr. Frank Harbaugh of Cincinnati, Ohio, who has been a barber for more than forty years, recently made the following statement:

"Anyone can prepare a mixture at home at very little cost that will turn gray hair, and make it soft and glossy. To a half-pint of water add 1 ounce bay rum, a small box of Borax Compound and 1 ounce glycerine. These ingredients can be bought at any drug store at very little cost. Apply to the hair twice a week and the dark hair will be obtained. This will make a gray-haired person look twenty years younger. It is easy to use, does not color the most delicate scalp, is not sticky or greasy and does not rub off."

Keep The System Clean And You'll Be Healthy

Elimination helps to avoid colds, headaches and epidemics

ANYONE who has watched himself knows there is nothing so important to health and comfort as regular daily elimination. Half of the minor illnesses of life are due to neglect of this. The five million men who were in our army know the importance of the doctor attached to this function.

By all means try to regulate yourself by intelligent diet and exercise, but when these fail you will need a laxative, one as poor to nature in its action as skill can make it. In the opinion of many thousands of good Americans such a one is Dr. Caldwell's Syrup Pepsin, which is a combination of simple laxative herbs with pepsin. It acts promptly, gently and without gripping and will with certainty regulate any tendency to constipation that you may have.

DR. CALDWELL'S SYRUP PEPSIN THE PERFECT LAXATIVE

In spite of the fact that Dr. Caldwell's Syrup Pepsin is the most famous liquid laxative in the world, there being over 6 million bottles sold each year, many who need its benefits have not yet used it. If you have not, send your name and address for a free trial bottle to Dr. W. B. Caldwell, 512 Washington St., Monaca, Illinois.

Millions of teeth now glisten

Millions of teeth are now daily brushed with Pepsodent. You see them everywhere—white, glistening teeth. On every hand it is evident that a new era has dawned in teeth cleaning. But the result is more than beauty. Those film-free teeth are safer. To countless people this new method will bring life-long benefits.

See the results on your own teeth. Let your mirror tell you what they mean to you. The test is easy, pleasant, and is free. Old methods have proved inadequate, as nearly everybody knows. See what this new method does.

Brushing doesn't end it
The film clings to the teeth, enters crevices and stays. If not removed it may harden. It destroys the luster of the teeth, and month after month it may do ceaseless damage. The tooth brush does not end it. The ordinary tooth paste does not end it. So countless teeth discolor and decay despite the daily brushing. Teeth troubles have become, in late years, almost universal.

Now you can combat it
After years of searching, a way has been found to fight film. Able authorities have proved its efficiency by clinical and laboratory tests. Leading dentists everywhere, after testing it and watching it, now urge its daily use.

Teeth Are Coated

With a Cloudy Film—Watch Them Whiten When You Take It Off

All Statements Approved by High Dental Authorities

Your teeth are coated with a film. It is that viscous coat which you feel with your tongue. Millions of teeth are dimmed by that film, and millions are destroyed. Modern dental science traces most tooth troubles to it. It is that film-coat that discolors—not the teeth. Film is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. Many other troubles, local and internal, are nowadays traced to those germs.

By HUGH S. FULLERTON.
Cincinnati and St. Louis are off in the lead in the dops, with Brooklyn and Boston close up and the rest straggling.

The amazing thing to me in the study of the dops on the first base position value in the two major leagues is not so much in the slump of several of the stalwarts of previous dopping seasons, but the great disparity of strength between the two leagues.

The National League, a league which we believed and hoped was going back and at last going to be a league of the future, has shown the worst bunch of first basemen ever assembled in major league uniforms. The American League first basemen, while not quite up to the standard of previous years, outclass the old leaguers.

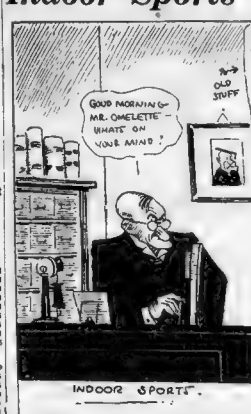

With Chase gone, dropped at last from his supremacy as king of the first basemen, the National presents a very ordinary lot.

The fact that ancient Jack Taubert, who the undisputed lead in the National is of itself sufficient commentary. Of course, Jack came back strong last season and played far better than he has since.

Reds Need Daubert Very Badly
Last year we were misled woefully in the dops, because, on the figures of the preceding season, no one could refuse to put Fred Merkle close to the top. He did hit at terrific clip the preceding year and, better than any other, he hit above the belt.

Detroit Unexpectedly Strong on First
Detroit shows rather unexpected first base strength. Of course, Jimmie Kinnison can hit, but also he has developed a lot of ability in other lines and some of the figures, especially in the field, are very good.

Heydler Challenges Lee Magee

New York, March 25.—Lee Magee is invited by President Heydler of the National League to make public immediately his charges, or to borrow the players' own words, to explode the "baseball bomb" in baseball history.

Heydler in a letter to Magee, secretary, Robert E. Allen, of Cincinnati, stated no further action would be taken to the subject unless Magee "produces evidence implicating others with him, or showing them to be guilty of wrongdoing in which he took no part."

BOSTON MARKSMEN IN TIE WITH BIRMINGHAM

The Boston Rifle and Revolver Club held the Birmingham, Ala., Athletic Club R. This is the highest score ever shot by the Boston Club, and the service of Captain Rabbit Maranville, who cut his hand severely before the Columbus team, he will be unable to get into the game.

Umpire Problem Is Source of Argument

The umpire question is still causing considerable amusement for those in the early who realize that the main object of the storming tour is to secure as many stray dollars as possible from Southern fans. The fact that the umpire is still a problem is also due to the fact that the special train before long has hit Brennan in all numbers among those present.

A roll call of the best known women professional and amateur players would have nearly a full response. It would include such names as the few stars who are not here to give the list of those who are here.

Common Sense Returning
Never Kill Hope
The Multi Man
Observe the Lion
By Arthur Brisbane

Common sense, permitting German troops to enter the occupied zone and keep order indicate that reason is returning after the war. Every Frenchman and Englishman knows that it would be impossible for German soldiers to keep order on French or English soil. It is also impossible for any but German soldiers to maintain permanent order on German soil. You can shoot men easily. But you cannot shoot ideas or kill them, especially the idea that each should rule in his own little corner of the world.

Nitti, for Italy, reveals the return of common sense in his statement that the other nations of Europe must begin to treat the vanquished as though they were human beings, if only to get indemnities hoped for.

It would be foolish to throw a man on the ground, sit on his chest, and urge him to get up for you, at the same time refusing to move from his chest. If you kill hope and ambition in human beings, you kill everything else. Referring to the fact that a "racial colony" in South America.

The natives were made Christians and slaves simultaneously. The treatment was kind, considering the times and the place. They had good barracks, etc., worked and slept regularly. But the land was not theirs, freedom was not theirs, hope was not theirs.

The natives simply stopped breeding. Not by any I. W. W. arrangement, but simply through distaste for life, the natives let themselves die, and the colony was a failure.

The hope that they might be eternally happy after death was not enough, they wanted excitement, freedom and hope on earth. Senator Borah renders public service, raising the question about rich men's money for rich men's candidates.

The prosperous have been playing with this nation and the United States treasury long enough. Naturally they would be willing to pay well for continuance of the good times that began with the war. It is pleasant to pull the strings of taxation and patriotism and put the result in your own pockets. But the people have been watching the process long enough.

They want to know who the man are that enable presidential candidates, without private fortunes, to spend hundreds of thousands before a nominating convention.

The kind of American that will advance one or five hundred dollars to his pet candidate does not because he hopes to see the people's pocket for the next four years and for no other reason.

Two little news items interest the thoughtful student of history's small type, which is the daily newspaper.

A gentleman was observed at Atlantic City carrying a muff. A criminal in Texas, charged with murder, was caught, indicted, tried, convicted, sentenced to be publicly hanged, and with twenty-four hours to live.

The man with the muff is called footloose, without meaning; the criminal is called a hanged man. The "swif" must be a mistake, trying and hanging in twenty-four hours would be more impressive if the man hanged were not a negro. In such "swif" justice there is as much race prejudice as justice. Justice is never swift and never slow. When it is either it is not justice.

The man with his muff is by no means a foolish thing, without meaning, but an interesting revelation to old days and old types. It is only a few tens of thousands of years, and long history of a world that will last millions of years, since man was the hairy creature, half ape, half human race. Re-Ed's "swif" explains the muff man's mistake.

Nature, in the beginning, death, entry the heavy body of a female and the fancy clothes and charms on the male.

Observe the male lion's mane, the peacock's tail, the male cat's voice, his wife's purr, the horn, the bull lion's magnificent front end, etc.

It used to be the same with man. He wore his hair long, tattooed, his body decorated his car with fancy shells, necklaces of animal teeth, pieces of bone in his nose and ears, colored his face and body with red ochre and fat.

The woman, with hair short, clothes and face plain, did the hard work. The thing that interested in our own yesterday by the Indian warrior and his dowry attire.

For a while, as in the 16th and the 17th centuries at the French court, men and women dressed each other in fancy folly. They gaily made men's clothes and realized that what he had in his head, not what he wore on his back, made the difference.

The remarkable thing is that so few men make fools of themselves.

MEMORY OF FAILURES SERVES IN CRISES

By Mrs. Wilson Woodrow

THE host at our dinner party— a very successful inventor— had fallen to reminiscing and was giving a broadly humorous account of some of the shifts and subterfuges before fortune came his way.

He told, I remember, of his horror on one occasion when he had invited a number of capitalists to his office to discuss a proposition he wanted them to back, and not half an hour before the conference the sheriff walked in and took possession of the place under an execution.

Was Nonplussed
The inventor was nonplussed. He asked the sheriff, uncertain what to do. All the structure of bright hopes he had been building on the strength of the coming interview crumbled about him; for he knew that this exposure of his financial weakness would scare off the support for which he was waiting.

Then he remembered a poker game, where he had laid down a full hand before the superb bluff of an opponent who held absolutely nothing and it offered him a suggestion.

When the financiers arrived he told them his inner conflict. "Confidence," he said, "you will have to give me an answer to my proposition—yes or no—within five minutes. That man outside is a representative of one of the biggest corporations in the country."

And so the sheriff was a representative of the State of New York. "He wants to take over whole concerns without delay, and unless you agree to my terms, I am going to let him do it."

The stratagem worked to a charm. As one of the syndicate afterward confessed, they had come there prepared to haggle and to keep him dangling on his uncertainty for weeks. But the idea of competition and the bold front he put up brought them to time, and the deal went through that afternoon.

Solve Dilemmas
"If people would only recall their past mistakes," the inventor drew his moral, "they could extricate themselves from many a dilemma."

"You evidently believe," I said, "that we learn more from our failures than from our successes?"

A criminal in Texas, charged with murder, was caught, indicted, tried, convicted, sentenced to be publicly hanged, and with twenty-four hours to live.

The man with the muff is called footloose, without meaning; the criminal is called a hanged man. RESIGNATIONS OF
TEACHERS
TO TAKE BETTER
PAYING POSITIONS

Edwin A. Grozier of the Post, a Great and Patriotic Editor

The name of Edwin A. Grozier of the Boston Post stands in the minds of all New England and of the nation at large for 100 per cent. Americanism and patriotism. There is no better American living than E. A. Grozier and there is no higher minded journalist.

The opinions and policies of the Boston American differ materially from those of the Boston Post. Especially is this true in regard to England and the League of Nations. But Mr. Grozier knows that Mr. Grozier's opinions, no matter how much they may differ from his own, are always based upon what Mr. Grozier believes to be the best interests of the people.

Difference of opinion is desirable. Freedom of discussion is beneficial. It is Mr. Grozier's right to have his own opinion and it is his duty to express an honest opinion, based on patriotic convictions, forcefully and fearlessly, as he, fortunately, has the courage and capacity to do.

Iron Hand Needed in Dealing With Rent Profiteers

The High Cost of Living Commission recommends to the cities and towns the appointment of local commissions to deal with the question of rent profiteering. They recommend the choice upon these commissions of a real estate man and a representative of the local trust, savings and co-operative banks.

This would make two representatives of the real estate interests, with four others of which only one would necessarily be a rent payer. But waiving the wisdom of this method of making up these commissions, we call attention to the statement of the commission that "in nine cases out of ten satisfactory adjustments can be made by simply bringing the landlord and tenant together, obtaining all the facts in detail and REQUESTING that the committee's recommendations be accepted."

Now, of course, this is better than no method, but it is a very poor makeshift. We venture to say that not in one case out of ten would the work of such committees be satisfactory. The tenant is in a very disadvantageous, embarrassing and indeed helpless position with respect to the landlord in a situation like this, unless the result of the hearing is to be a definite long term lease.

The reason for this is obvious. If the tenant is a tenant at will and is to remain a tenant at will he understands perfectly that his landlord can put him out at any time for any other reason than that of insufficient rent. He can make his life unbearable in the house by refusing to keep up the property and a score of other little annoyances.

The tenant ought not to have the burden of protesting against an increase of rent. The burden ought to be entirely upon the landlord to justify the increase, and the controversy should be between him and the public authorities, so that when it is over, if the decision is against the increase of rent, the landlord will have no grievance against the tenant, and would have nothing to gain by putting him out upon some specious collateral excuse.

We need legislation and we need some authority armed with power, and not a committee depending upon persuasion. We need the power behind the persuasion in dealing with profiteers. We need the iron hand in the velvet glove.

Debt of Honor Which Must Be Paid, Whatever the Cost

J. D. Hartigan of Vale, Ore., was a corporal in the 16th Infantry. He has the West's habit of direct speech. Here is his view of the bonus question:

By their extravagance in spending lives the doughboys of the A. E. F., according to the best military opinion, shortened the war by one to two years, and saved Americans at home from footing a bill of from \$10,000,000,000 to \$20,000,000,000 more than the war actually cost them.

Now we find niggards at home who think we didn't do the right thing because we didn't get a wooden cross over there, but instead came back to better them about a small bonus which which to get on our feet. You will find no close inspection that the birds who are objecting to a bonus for soldiers are wearing four-colored overalls while the service men in wearing his O. D.

If the bonus costs \$2,000,000,000 and requires a bond issue it is no worse than you would be paying now if we had taken it as easy as Congress is doing.

Candidly, this is unanswerable. The bonus is a debt of honor. It should be paid without quibbling. But, quibbling, or no, it must be paid.

Remedy That May Be Worse Than the Disease

The Montreal Board of Trade, the largest body of its kind in Canada, has declared in favor of Canadians buying only Canadian goods. Its example is being followed by other Canadian business organizations.

Undoubtedly the exchange situation is bearing heavily upon Canada. Intelligent residents of the United States, though powerless, are sympathetic. They will not question the right of their Northern neighbors to protect home interests first, for they believe in the same policy for their country.

In the long run, however, adverse exchange will not yield to immaturity, but will require increased interchange. It is, therefore, open to question whether the Montreal remedy is more than the disease.

Y' TOWNE GOSSIP

Registered U. S. Patent Office.

By K. C. B.
My Dear Mr. K. C. B.—I read in the papers that you answer letters through your Towne Gossip registered U. S. Patent Office. Well, when we got married Elizabeth made 120 pounds and I made 120 too. She used to sit on my lap. Now she weighs 204 lbs. and still sits on my lap until my legs go to sleep. I don't tell her not to because it would hurt her feeling and I still love her she is better. I weigh 120 lbs. what shall I do.

P. B.—Don't be afraid. Elizabeth can read American.
MY DEAR Eddie.
ONE OF the troubles.

OF MARRIED folk.
IS THAT very often.
THEY BEGIN their careers.

ON AN equal plane.
AND AFTER they're married.
ONE KEEPS growing.

AND THE other doesn't.
AND IT leads to trouble.
AND VERY often.

AS IN your case.
THE ONE that grows.
BLOTS OUT the other.

JUST AS Elizabeth.
BLOTS OUT you.
AND THE only thing.

THAT I can see.
THAT YOU can do.
IS TO dig right in.

AND TRY to get fat.
AND WEIGH 200.
AND IF you'll do that.

WHENEVER IT happens.
ON HER hubby's lap.
YOU'LL BE able to hold her.

WITHOUT GROWING numb.
BECAUSE THE way it is now.
THE LONGER you go.

WITH YOUR very short weight.
AND JUST sit around.
WITH HER on your lap.

THE QUICKER you shrink.
AND BE no use at all.

Can Your Emotions Mark Your Baby for Life?

Can fright, anger or other powerful emotions experienced by a prospective mother influence the character and life of her unborn child? That is the interesting question which scientists are endeavoring to decide.

Shortly before little Jessie Hogan was born her mother was attacked and bitten by a vicious horse. After Jessie's birth the little girl developed characteristics which have won for her the name of "horse child" among her companions.

The unfortunate child, now four years old, neighs and whinnies like a horse when it is hungry, holds its head up and down like a nervous horse, rolls its eyes in a manner similar to that of a horse—and is deaf and blind.

Dr. Arthur C. Jacobs, associate editor of the Medical Times, writes for the Boston Sunday Advertiser this week on "The Moral Influence," talking as his text the strange case of Jeannette Hogan.

Every detail has now been completed in connection with the running of sixteen-passenger aerobuses in a regular service from Florida to Cuba.

Six companies are planning to run airplanes on this route. Competition is likely to make the trip comparatively inexpensive. It is the construction of the great air-liners which will interest the public, however. The Boston Sunday Advertiser is devoting a page of its Magazine Section next Sunday to a detailed description, with photographs of these Pullmans of the air, which are equipped with heat, artificial light, lavatories and a window for each passenger.

The Prince of Monaco, the greatest scientific fisherman in the world, announces some strange discoveries regarding the denizens of the ocean depths.

It is the first time that science has had proof that life exists at such tremendous depths, where the pressure is 19,327 pounds on every square inch. Photographs of the grotesque monsters, together with a full account of the Prince's latest fishing expeditions miles below the surface of the ocean, appear in the Magazine Section of next Sunday's Boston Advertiser.

Emptying the CHILDREN'S BANK
In your haste as a prospector you have no more about saving and economy that you felt like leaving the room every time the subject came up.

You heard about it, but you did not get the right incentive to save. You were told you should start a bank account, and when you had enough saved to buy you a suit of clothes your parents took the money and bought the suit for you.

Of course, there was a certain pride in having a suit bought with your own money, but the money was gone—all of it—and you began all over again.

Are you following this same policy with your children? Do you let them keep their bank account intact and teach them to watch money earn money by keeping it in the bank undisturbed? Impress them with the fact that interest accumulates with the years and that one must have money to get an income when they get to be old, and that they have some good years in between to get the comfort for old age assured and they will get into the game in earnest.

It does not take much talent for mathematics to get this lesson in a practical way, and teach the children, little and big, how great a thing is thrift.

I THANK YOU.
